

DIMON
TECHNOLOGY

A black, circular, multi-faceted mechanical component, likely a heat sink or cooling fan, with a central mounting bracket and a vertical support structure. The component features a central cylindrical hub with a smaller cylindrical protrusion on top. A vertical support structure, consisting of a rectangular frame with a horizontal bar at the top, is mounted on the central hub. The base of the component is a circular plate with numerous radial fins or spokes extending outwards. The entire assembly is shown against a white background.
