

1-10V Rotary Glass Panel Dimmer

Model No.: T18-2

Rotary dimming/Glass panel/AC relay output/Wireless remote control

CE RoHS LVD

Features

- Rotary glass panel 1-10V dimmer, 1 channel output.
- Output 1 channel 1-10V signal, connect with 1-10V dimmable driver.
- High voltage AC input, High voltage AC relay output.
- Rotate knob to change brightness, support push and long push operation.
- 256 levels 0-100% dimming smoothly without any flash.
- Compatibility with RF 2.4G single zone or multiple zone dimming remote control.
- White & Black glass panel available.

Technical Parameters

Input and Output	
Input voltage	AC100-240V
Output voltage	AC100-240V
Output signal	1-10V (20mA)
Output current	Max 1.5A (AC) Standard or 5A (AC) For request

Safety and EMC	
EMC standard (EMC)	EN 55015:2013 EN 61547:2009 EN 61000-3-2:2014 EN 61000-3-3:2013
Safety standard(LVD)	EN 61347-2-11:2002 EN 61347-1:2015 EN 62493:2015
Certification	CE,EMC,LVD

Dimming data	
Input signal	Rotary knob + RF 2.4GHz
RF Control distance	30m
Dimming level	256 levels
Dimming range	0-100%

Environment	
Operation temperature	Ta: -30°C ~ +55°C
Case temperature (Max.)	Tc: +65°C
IP rating	IP20

Warranty	
Warranty	5 years

Mechanical Structures and Installations

Mechanical Structures and Installations

Typical base as below:

Installation diagram:

Knob function

- Push: Turn on or off light.
- After turn on light:
 - Rotate: Rotate knob to adjust brightness, 2.5 turns, 50 levels.
 - Long push(1-6s): Continuous 256 levels brightness adjustment.

Note: The default output is 1-10V, if you want to 0-10V output, please push the knob to turn off light, then push the knob for 15s immediately, the output will become 0-10V. Push the knob to turn off light, then push the knob for 10s immediately, the output will return 1-10V.

Wiring diagram

- Connect with 1-10V dimming driver (no use AC OUT)

- Connect with 1-10V dimming driver (use AC OUT)

- Connect with 1-10V dimming driver (use AC OUT and relay or contactor)

An additional AC relay or contactor is needed when total input current of the load is higher than 1.5A or inrush current is greater than 15A.

Note: We recommend the number of LED drivers connected to 0/1-10V dimmer does not exceed 5 pieces. The maximum length of the wires from dimmer to LED driver should be no more than 1.5 meters.

Match Remote Control (two match ways)

The 1-10V rotary panel dimmer can also match with the RF dimming remote (optional). End user can choose the suitable match/delete ways. Two options are offered for selection:

Use Knob

Match:

Turn on light, turn off, immediately push the knob for 5s, then press on/off key (single zone remote) or zone key (multiple zone remote) of the RF remote within 5s. The LED indicator fast flash 3 times means match is successful.

Delete:

Turn on light, turn off, immediately push the knob for 10s, The LED indicator fast flash 6 times means all matched remotes were deleted.

Use Power Restart

Match:

Switch off the power, then switch on power again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 3 times on the remote. The light blinks 3 times means match is successful.

Delete:

Switch off the power, then switch on power again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 5 times on the remote. The light blinks 5 times means all matched remotes were deleted.
